

## Welcome to the Residence "La Banditaccia"!

Thank you for choosing our Residence, we hope you enjoy an unforgettable stay. We would like to point out certain aspects of the house that will only make your stay more pleasant.

As you will have read, the house was recently built (finished in 2008) and careful attention was given to the materials used and to the quality of the fittings.

Everything has been chosen with great care and safeguard for the environment and the well-being of our guests: from solar panels for heating water, to the use of salt other than chlorine for disinfecting the swimming pool, both indoor and outdoor, from low-power lighting system, to a totally organic vegetable garden.

We are sure to count on your collaboration, We therefore invite you to embrace our philosophy avoiding, where possible, to waste water and electric power.

Thank you and Happy Holiday!
